Ayesh Nawawickrama

Product Engineer · Full-stack SaaS

Sri Lanka (UTC+5:30), open to remote work · +94 77 938 9533 · nawawickrama@gmail.com · linkedin.com/in/nawawickrama

SUMMARY

I build software products end to end, from the first conversation with a client to the release people use every day. At ToBeShore I build a field service platform and a Microsoft Teams leave app for Swedish clients. As co-founder of Coredile I designed and built Coredile POS, an offline-first point of sale for shops and restaurants. I've been writing software since 2014: 80+ freelance projects for clients in Sweden, the UK, the US and Canada, then six years in professional roles.

SKILLS

Languages	PHP, Laravel, TypeScript, JavaScript, React, Angular, Flutter, Electron
Infrastructure	PostgreSQL (row-level security), MySQL, SQLite, Redis, Docker, Coolify, Linux, CI/CD, Git
Product	Multi-tenant SaaS, offline-first sync, REST APIs, Microsoft Teams integration, payments (Stripe, PayPal, PayHere), Pest, PHPUnit, Playwright
Design and AI	Figma, Adobe XD, Google UX certificate, Claude Code, custom Claude skills, n8n

EXPERIENCE

Co-founder & Product Engineer · Coredile, Sri Lanka — Jul 2026 – Present

Coredile POS: an offline-first point of sale and business platform for shops, bakeries and restaurants.

- Designed and built the product end to end: a Laravel API, React apps for the till, back office and admin panel, and a Windows till in Electron.
- Made the till keep selling with no internet. Every sale is saved locally and synced when the connection returns; a simulator runs twenty tills against the server with the connection cut to prove it.
- Multi-tenant on PostgreSQL, with each business's data kept apart by row-level security. Money and stock are exact decimals, never floating point.
- Shipped restaurant floor plans and kitchen screens, recipe costing, Sri Lankan VAT and SSCL on receipts, and licences and billing in an admin panel.
- Deployed with Docker on Coolify; tested with Pest and Playwright. Built working closely with AI coding tools (Claude Code).

Software Engineer Level II · ToBeShore (Pvt) Ltd, Sri Lanka · Swedish-owned — Jan 2026 – Present

- DocRepeat (field service management): build the Angular web app and the Flutter app technicians use in the field, on .NET Core services, and help decide what gets built next.
- DayzOff (leave management): built core Angular features and the Microsoft Teams integration.
- Run DocRepeat's social media campaigns, so I see how each feature lands with customers.
- Built Claude skills and CI/CD pipelines the team uses to ship faster.

Web Engineer · ToBeShore (Pvt) Ltd — Jun 2023 – Dec 2025

- Built and looked after client websites in WordPress (Elementor Pro, Divi), with WAF security and WP Rocket for speed.
- Designed interfaces in Figma and Adobe XD, then built them in Flutter, React and Angular.
- Started on DocRepeat: Angular front ends on .NET Core services, and the Flutter app for field technicians.

Web Engineer (Remote) · IAS College, Germany May 2021 – Jun 2023

- Built PHP and Laravel back ends with MySQL and SQLite, plus API integrations.
- Built WooCommerce stores with Stripe, PayPal, PayHere and Payoneer payments, and custom WordPress plugins.
- Responsive front ends with Bootstrap, jQuery and DataTables; on-page SEO with Yoast and Rank Math.

Freelance Web Developer · Fiverr Sep 2014 – Present

- 80+ projects for clients in Sweden, the UK, the US and Canada, scoped and delivered directly with each client. 5.0 rating, many returning clients.

Associate Web Developer (Part-time) · Cellmart LK (Pvt) Ltd, Sri Lanka Aug 2019 – Jan 2020

- Built the company website and an internal inventory system in PHP and MySQL, with role-based access, stock dashboards and REST APIs that synced product data.

SELECTED WORK

Coredile POS · Co-founder, lead engineer Sri Lanka

Offline-first till and back office for shops, bakeries and restaurants, sold in editions per type of business. Laravel, React, Electron, PostgreSQL, Redis, Docker.

DocRepeat · ToBeShore Sweden

Field service management: an Angular dashboard for the office and a Flutter app for technicians in the field, on .NET Core services.

DayzOff · ToBeShore Sweden

Leave management that works with Microsoft Teams. Angular, Microsoft Teams APIs.

Let's Ride · Co-founder letsride.lk

A marketplace where tourists post a trip around Sri Lanka and local drivers bid for it. Laravel API, React web app and admin console, Flutter app, real-time chat and bids with Laravel Echo.

EDUCATION

Master of Information Technology (Distinction) · University of Kelaniya 2021 – 2023

BSc Physics & Electronics · University of Kelaniya 2018 – 2021

Google UX Design: Foundations of User Experience Design · Google Nov 2025
